

Proceedings of the Twenty-Fifth Symposium on Biotechnology for Fuels and Chemicals Held May 4-7, 2003, in Breckenridge, CO

Filesize: 2.26 MB

Reviews

The ebook is easy in read through easier to fully grasp. It is rally fascinating throgh reading through time. I am effortlessly can get a enjoyment of reading a written publication.
(Kiarra Schultz III)

PROCEEDINGS OF THE TWENTY-FIFTH SYMPOSIUM ON BIOTECHNOLOGY FOR FUELS AND CHEMICALS HELD MAY 4-7, 2003, IN BRECKENRIDGE, CO

DOWNLOAD

Humana Press Jan 2013, 2013. Taschenbuch. Book Condition: Neu. 254x178x67 mm. This item is printed on demand - Print on Demand Neuware - th With the 25 Symposium, we continued the tradition of providing an informal, congenial atmosphere that our participants found conducive to discussing technical program topics. This year's topics included: Session 1A Feedstock Supply, Logistics, Processing, and Composition Session 1B Enzyme Catalysis and Engineering Session 2 Microbial Catalysis and Engineering Session 3 Bioprocessing including Separations Session 4 Biotechnology for Fuels and Chemicals-Past, Present, and Future Session 5 Biobased Industrial Chemicals Session 6A Biomass Pretreatment and Hydrolysis Session 6B Plant Biotechnology and Feedstock Genomics Special Topics A Microbial Pentose Metabolism Special Topics B International Bioenergy Agency Bioethanol Meeting A summary of these sessions is included at the beginning of each section of the Proceedings. The technical core of the Symposium remains the creation, manipulation, and practical use of new biocatalysts to produce useful fuels and chemicals. This was shown in both fundamental science discoveries as well as progress reports from commercialization efforts. However, we have continued to expand interest into the bio feedstock (plant genomics, production, and pretreatment). While the production of sugars from biomass and their subsequent bioconversion into chemicals remains the dominant thrust, areas such as gasification and direct production in plants were presented. The use of molecular biology and genomics to provide new biocatalysts as well as understanding the fundamentals of the microbes, enzymes, and biomass has increased the likely achievement of both near and long-term commercialization goals. This year Dr. J. 1268 pp. Englisch.
