The present form was published in Kyoto Sangyo Daigaku Ronshuu, Humanities Series No. 30 (March 2003) 1-20. , abstract: Strata models are systems of categories that we project upon phenomena in order to make sense of them. They correspond to a synthetic mode of thinking, which attempts to strike a balance between the observation of universal laws and the description of individual characteristics. Like most concepts in the humanities, they do not limit, but rather serve to accentuate observed phenomena. They group together certain aspects of literature into unified strata of systems which can be said to stand in a relation to one another comparable to that of psychological strata within the human personality. The application of a strata model to the analysis of literature is mainly pragmatically motivated. The literary scholar or the interpreter of literature is less concerned with philosophical insights than with an objective comprehension of the literary work. The philosophical dispute as to the justification of strata models as such will be of no concern in this paper. (In: Kyoto Sangyo Daigaku Ronshuu, Humanities s. No. 30, march 2003, 1-20) 24...
