There are on the market toriay numerous appliances to secure this end and one of the latest of these is the chair and the auxiliary bar is placed at After a brief consideration of the right angles, resting in transverse older methods of construction, Mr. slots, and is driven home tight by McCullough reviews the results of recent investigations and experiments made to more accurately determine the pressures to which sewers are subjected. Reinforced concrete, with its tensile as well as compressive strength, permits more definite design than has hitherto been possible. Reinforcement is not, however, advisable in sewers below 4 ft. in diameter in monolithic construction. Whether concrete sewers will be cheaper than brick sewers is a point which can be considered only at the time the work is to be done and cannot be decided hastily. THE NATIONAL CHAIR ON A COLUMN SPIRAL. crimped cut sheet metal wedges. This makes an absolutely rigid connection, held at the proper distance from the centering. This can be applied to column reinforcement very econom-ically, building up a field-made spiral which is rigid enough to support a man s weight. The same principle, that is, an ab-solute interlocking or reinforcing members without effecting the integ-riety of the fiber, is applied to National wire cloth. A rectangular mesh rein-forcement, in which the joint is an exterior piece of sheet metal, locking and wedging the cross members into an absolutely rigid joint. The rein-forcement is...
