Brand New Book ***** Print on Demand *****.Excerpt from The Theory of General Relativity and Gravitation At the Conference on Recent Advances in Physics held in the Physics Laboratory of the University of Toronto from January 5 to 26, 1921, a course on Einstein s Relativity and Gravitation Theory, consisting of fifteen lectures and two colloquia, was delivered by the author. The first six of these lectures were devoted to what is known as Special Relativity, and the remaining ones to Einstein s General Relativity and Gravitation Theory and to relativistic Electromagnetism. In view of the time limitations only the essentials of these theories were dealt with, due attention, however, being given to the critically conceptual side of the subject. The University was kind enough to undertake the publication of that part of the course which dealt with general relativistic questions, on the express understanding that my prospective readers should be assumed to be already familiar with the special theory of relativity. In this connection it was suggested by Prof. McLennan that those unacquainted with the older theory should be referred to my book of 1914 (The Theory of Relativity, Macmillan, London) and that it would therefore be desirable to make the present volume, as much as possible, uniform in exposition and style with that work. With such requirements in view this little book was shaped, only a few pages at the beginning having been used in recalling the essentials of the special relativity theory. The treatment, as compared with the Toronto lectures, has been made somewhat more systematic and the subject matter has, here and there, been considerably extended. In this respect the author has been partly influenced by a larger course on...
