Geometric Topology: 1993 Georgia International Topology Conference August 2-13, 1993 University of Georgia, Athens, Georgia (Ams/Ip Studies in Advanced Mathematics , Vol 2, So2)

By William H. Kazez; Georgia International Topology Conference; Editor-William H. Kazez

American Mathematical Society, 1997. Hardcover. Book Condition: New. Brand new. We distribute directly for the publisher. Clean, unmarked pages. Hardcover. This is a two-part volume reflecting the proceedings of the 1993 Georgia International Topology Conference held at the University of Georgia during the month of August. The texts include research and expository articles and problem sets. The conference covered a wide variety of topics in geometric topology.Features: * Kirby's problem list, which contains a thorough description of the progress made on each of the problems and includes a very complete bibliography, makes the work useful for specialists and non-specialists who want to learn about the progress made in many areas of topology. This list may serve as a reference work for decades to come. * Gabai's problem list, which focuses on foliations and laminations of 3-manifolds, collects for the first time in one paper definitions, results, and problems that may serve as a defining source in the subject area.Titles in this series are co-published with International Press, Cambridge, MA.ReadershipGraduate students, research mathematicians, and physicists interested in manifolds and cell complexes.Reviews"This is an extremely useful piece of work and the whole community can be very grateful that Kirby has

Reviews

It becomes an awesome publication that I actually have actually read. It really is writter in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
-- Talia Cormier

If you need to adding benefit, a must buy book. it was writttern really perfectly and beneficial. You may like the way the author create this ebook.
